

Sample PreK Floor Plan

for keeping ALL kids engaged!

1.

Clearly label shelves, containers, and cubbies so children can find materials and clean them up independently.

2.

Move tables close together to encourage student interaction during meals.

3.

Break up the middle of the room to discourage kids from running in the classroom.

4.

Create four distinct zones with several distinct activity centers.

5.

Set up clear boundaries between noisy and quiet activity centers to reduce conflict between kids who prefer different types of activities.
